Electrified Fleet

The Future Fleet is Here

Staff as Green Champions

In 2023 The Scottish Ambulance Service launches the 'Green Champion Network' to:

- Engage staff
- Embed good practice
- Focus on sustainability
- Create a suitable environment
- Reduce consumption
- Improve recycling
- Wider Community engagement

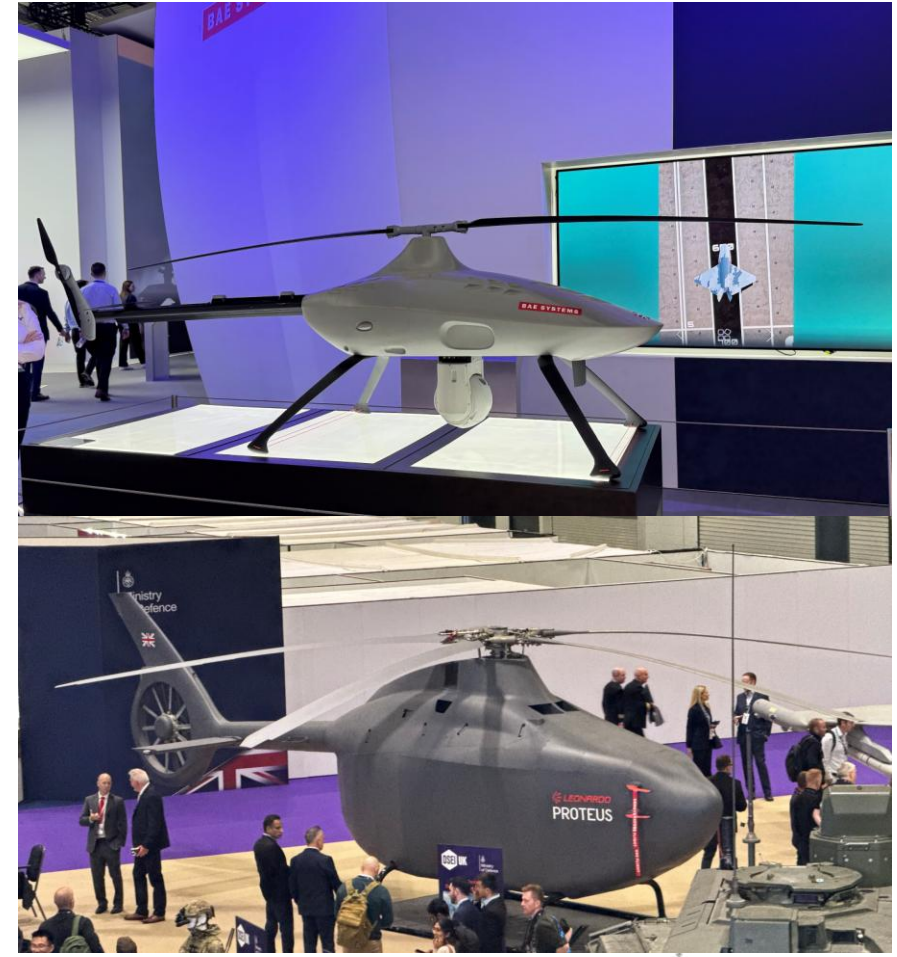

What can Green champions help to achieve?

- Identify and develop initiatives that can help reduce emissions, costs, risks and improve processes and systems.
- Improve staff satisfaction by illustrating sustainability commitment that aligns with staff values
- Align with the Service's Net Zero Plan, Sustainability Policy and Health Well-being Strategy
- Utilise sustainability as a means to deliver wider improved outcomes for staff

What can Green champions do?

- Create a **network** of staff who share a common interest in sustainability, and to share ideas and encourage best practices across teams.
- Develop **professional skills** that align with departmental and corporate strategies, delivering net zero, zero waste and improving our overall sustainability.
- **Empower** staff to promote behavioural change in the Service and deliver the Service's sustainability policies
- To **showcase and recognise** staff for their work

What's next for SAS?

Ambulance of the Future

Key Features

Zero-emission power

Smart navigation

Drone support

Adaptive care pod

Onboard diagnostics

Telemedicine hub

Paramedic AR support

Safe autonomous driving

Community health role

Eco-friendly design

Thank You
