# The Sustainable Healthcare Coalition

...is a partnership of healthcare companies and other health agencies drawn together to address some of the most pressing sustainability issues in global healthcare.

Our purpose is to facilitate the journey towards good health and wellbeing on a finite planet, through **open-minded collaboration** across **public and private healthcare**.

We **engage**, **connect** and **accelerate action**.

Our core group draws in participation from other health system players including trade bodies, state healthcare providers, public health institutions and international agencies.
